The closest prior art of Stefik (U. S. Patent 5,638,443) teaches digital work comprising a description part and a content part. In regarding to independent claims 1, 7, 13 and 16, Stefik taken either individually or in combination with other prior art of record fails to teach or suggest one or more consequential right that are linked to another right and that are associated with respective content, and that are exercisable only upon satisfaction of a consequential event including expiration or exercise of the another right.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
